

# V-Chain Solutions Presents The Triple Green Supply Chain Event

San Francisco, California – December 11, 2008

A strategic B2B networking event for anyone looking to improve supply chain visibility and environmental sustainability

## Aligning People, Processes and Technology

Economic uncertainty, ecological concerns, and the demand for greater efficiency - unfortunately, it's the perfect storm! But for those in the know, it is possible to weather the storm - and emerge stronger, more profitable and more ecologically sound.

- Hear industry experts map out the road to a lean, green supply chain.
- Hear them explain how to deal with capabilities (sourcing, scheduling, inventory management, distribution) and risks (geopolitical, security, labor, natural and regulatory) in uncertain times.
- Hear how you can integrate long-term sustainability into your supply chain, to not only reduce the environmental impact but also achieve greater profitability and deeper customer loyalty.
- Learn how to reduce your energy needs - and even create a net gain for your company!
- Get a complimentary copy of the multi-company white paper [Triple Green 2008: Proven Ways to Go Green Today](#)

**ORACLE:** Experts outline their lean and green practices for the data center, business applications and reporting.

**FUSION STORM:** How to fuse technology with service and support for a less costly, more effective data center for your business.

**CANDIA COMMUNICATIONS:** Secrets to low-cost, environmentally friendly business communication that delivers results - across the supply chain.

**TECHNIQ SYSTEMS:** Actionable information on how to reduce fuel consumption and improve fleet efficiency through new technologies, including RFID.

**V-CHAIN SOLUTIONS:** Pioneer of the triple green initiative show the road to long-term sustainability and improved profits.

**ALTERNATIVE ENERGY SOURCES TECHNOLOGY:** Expert methods for reducing energy costs and generating low-cost clean power using existing resources.

**NZ CONSULTING and CONSCIOUS BUSINESS CENTER:** Learn the strategies, programs and implementation services that drive the triple bottom line: People, Planet and Profit.
